Röko reaches order book of over SEK 1.3 billion and targets first close on June 14

Röko AB is a new investment company established in April 2019 by Fredrik Karlsson and Tomas Billing. It will focus on investing in medium sized European companies with a long track record of profitability.

The capital raising process was launched in April 2019, and as of today, Röko has received preliminary commitments from investors amounting of over SEK 1.3 billion. In addition, Röko is confident it will raise additional amounts ahead of its first close. The capital primarily derives from private individuals and family offices. Röko has decided to accelerate the process and plans to hold its first close on June 14, 2019.

Parallel to the above, Röko has started to build a deal flow. Röko has met a number of companies that could be potential investments and has submitted its first indicative offer.

“Neither Fredrik nor I have experience from raising capital. That makes it particularly fun to have reached over SEK 1.3 billion so quickly.” says Tomas Billing.

“We are very glad and proud that so many in our wide circle of acquaintances have entrusted us with investments in Röko. Now we have to deliver returns.” says Fredrik Karlsson.

Gernandt & Danielsson is serving as legal advisor and SEB is serving as financial advisor to Röko in relation to the establishment and capital raising.
